EXPLORING THE ROUTES OF HYSTERECTOMY

2 Days Course with Hands-on Workshop and Live Surgery

Course Directors:

Dr. Hanan Gharbi
UAE

Pr. Arnaud Wattiez
France

 **Saturday, July 10 &
Sunday, July 11, 2021**
 **Holiday Inn Hotel, Dubai**

COURSE DESCRIPTION:

Hysterectomy, removal of the uterus, is the second most common major operation among women after cesarean section. Despite Minimally Invasive Surgery 's advantages, OB/GYN's have lagged behind other fields in adopting this approach. There is a great need for scientifically-validated, advanced surgical training that will assist practicing OB/GYN's in shifting surgical skills from the "open" hysterectomy approach to the laparoscopic approach, as well as train residents and fellows in the latest techniques for laparoscopic hysterectomy.

OBJECTIVE OF THIS COURSE:

- ☒ Review the relevant Anatomy for laparoscopic hysterectomy
- ☒ The available energy sources with a special emphasis on electro surgery.
- ☒ Safely perform an advanced gynecological procedure, Total Laparoscopic Hysterectomy, in properly selected patients.
- ☒ The risk areas for complications and the best ways to prevent and manage them;
- ☒ The post-operative follow-up procedures for both routes.
