

Together,
we innovate, we develop.

MIS Academy prepared plenty of courses this year to secure our mission in improving surgeons, doctors and nurses' skills through meaningful innovation of Minimally Invasive Surgery. Claiming that this will be **"Your place to master Minimally Invasive Surgery"**. It is the simplest distillation of MIS Academy promise that encapsulates all the features and benefits you will gain during each event and courses of MIS Academy. We make sure that you will experience a meaningful difference, not only mattering the development of your skills and knowledge but the assurance of giving every patient the access to the benefits of Minimally Invasive Surgery.

“It is very important to develop, teach, and train doctors to new techniques.

So that every patient can access to the benefit of Laparoscopic Surgery.”

Prof. Arnaud Wattiez

Founder of MIS Academy
